RE-NEGOTIATION OF WAR CONTRACTS

THE reference of President Roosevelt, in his recent message to Congress, to the necessity of continuing the practice of renegotiating war contracts, focuses the attention of the nation upon this problem. Just what "renegotiation" is and why efforts are being made to halt it has become an interesting side-light of the war here at home.

The practice of renegotiating contracts is simply reconsidering the terms of a contract which exists between procurement divisions of government departments and private business firms. For example, the War Department may have signed a contract with a piano manufacturing firm to produce wooden bodies for aeroplanes. Since the manufacturer has had absolutely no experience in the production of this new product, only the crudest estimates of what his costs of production will be can be made. There is not time enough to spend in minute calculations of costs before production; the planes are needed as soon as possible.

In a situation of this kind a contract may be signed by the Government based upon probable costs. If the estimates are too low, there is an opportunity for reimbursement. If the profits yielded are far in excess of a range of customary rates of profits, then the contract terms are renegotiated upon a more accurate knowledge of costs of production.

This reconsideration of costs and profits has yielded substantial refunds to the Government. In the last fiscal year, for example, the Government had returned to it approximately \$4.5 billions. In some instances, the Government did not demand payment in cash from the firms involved but sim-

ply applied the amounts due to its credit on unfilled orders. The effect of such acts was a net reduction in the total costs of the war. Last year some \$2.5 billions of the \$4.5 billions were used in that manner. The net balance—approximately \$2 billions—was returned to the Treasury of the United States as a cash refund.

Editorial

Some business men are strongly opposed to the entire process of renegotiation. Part of their opposition arises from instances in which the reviewing board of a particular agency of Government has allegedly been too drastic in its reduction of profits. Most of the objections, however, arise from the belief that the principle of renegotiation is unsound.

Those who oppose renegotiation, in principle, emphasize that the existing excess income tax rates are sufficiently high to prevent war profiteering. The

solution is clear: abolish renegotiation and let taxation of business income gather in excess profits. The admission is made that not all of the profits retrieved by renegotiation will be caught by the income taxes. For example, under the Revenue Act of 1942 the excess profit tax rate for most corporations would have been 81 per cent, after allowing for post-war credits. The fact that not all the excess profits would have been taken is defended partially on the score that some "seed capital" must be put away for the post-war period.

The agencies of the Government most directly affected—the Treasury, War, and Navy Departments—urge Congress to retain the use of the renegotiation practice. This process facilitates production of war materials by reducing delays which would be unavoidable if enormous profits are to be avoided. Furthermore, there is opportunity to correct honest mistakes in judgment which may have occurred in estimating costs of production. Finally, there are ways and means by which income subject to taxation may be calculated in order to avoid legally the recapture of excess profits.

The existing method of preventing scandals arising from excessive taxation is probably none too severe. After all is said, if the business firms are going to return most of the profits anyhow even if renegotiation of contracts is abolished, then there should be no substantial opposition to continuing a practice which has proved to be not unjust and not confiscatory. The argument that the portion of the profits, which could be kept if only the excess profits tax were applied, are

THE JOURNAL HAS GONE TO WAR

Paper has become so scarce that it too now is rationed. Along with all other Americans the members of the United Association must accept less reading matter. The editor will do his best to so apportion the pages of the Journal that your interest will be maintained and the Association as a whole will be well served.

(Continued on page 15)

CAN PATRIOTISM BE LEGISLATED?

WHEN the Congress reassembled early in January this year, it received the customary message of the President. The keynote of this message was a "program for winning the war". Secondarily, emphasis was placed upon the efforts of Mr. Churchill, Generalissimo Chiang Kai-shek, Marshal Stalin and President Roosevelt to prepare for the eventual peace conference. Another minor portion of the message was devoted to a "Second Bill of Rights". All portions of President Roosevelt's Congressional message are worthy of close reading and careful analysis. For the present, however, the program for winning the war shall be given immediate consideration.

The Program

The legislation program proposed by the President to Congress consisted of five recommendations:

1. Increased taxation.
2. Retention of contract renegotiation.
3. More effective control of food prices.
4. Re-enactment of the Economic Stabilization Act.
5. A National Service Law.

This program will affect the lives of every person in America. Indeed, it is no exaggeration to say that the lives of those not yet born will be influenced by the legislation which may be enacted. On some of the proposals made, the editor has already commented; specifically, the need for increased taxation and the necessity of genuine control of food prices. Limitations of space prevent consideration at this time of the existing contract renegotiation law and the advisability of re-enacting the Economic Stabilization Act of October, 1942. There is need for an immediate analysis of the President's recommendation for a National Service Law.

A National Service Law

In his recommendation on a National Service Law the President does not describe the structure of the proposed law specifically. Rather, he alludes to purpose of the law and some reasons why its enactment should and would receive hearty support from all Americans. To be exact, the President stated:

"(5) A national service law—which, for the duration of the war, will prevent strikes, and, with certain appropriate exceptions, will make available for war production or for any other essential services

every able-bodied adult in this Nation."

This statement apparently indicates that there are two reasons why Americans are to be drafted for production: to prevent strikes and to control the distribution of man-and-woman-power.

To Prevent Strikes

The relation between this labor-draft proposal of the President and strikes is clear—no matter what terms appear in the law: The right to strike is abolished during the war. This kind of legislation is a serious delimitation of the rights of citizens and must be thought through with great care. Above all, if any action of this kind is even being considered, then the first step in thinking must be a clear-cut answer to these questions:

1. Are strikes seriously impeding the war effort?
2. Will this legislation prevent strikes?

There is no need to defend the American worker against the accusation that he has seriously impeded the war effort by striking. The still undenied fact is that the workers of America are winning the battle of production. The output of American industry has exceeded all known records. Production of some war goods has been completed. Contracts are being cancelled. Employees are being discharged. Army and Navy E flags are commonplace. Only when the production records are proved false can there be serious consideration of strikes.

Is it not a peculiar kind of logic which leads to enactment of laws against that vast majority of Americans who voluntarily have fought the battle of production?

There remains the further question of whether or not a labor-draft law will prevent strikes. There exists today in England and Canada the kind of legislation proposed by the President. There is also present in these two countries workers who are now on strike. The simple truth is that national service acts do not prevent workers—organized and unorganized—from striking.

Since the President is attempting to prevent the loss of less than 1 per cent of all man-hours worked, the fact that a labor draft law does not guarantee the complete abolition of strikes is significant. The enactment of this drastic law should at least be a

guarantee that all strikes will be suppressed during the war.

To Control Man and Woman Power

The second reason indicated by the President for this legislation is to direct the use of manpower. While no facts are presented, the inescapable conclusion is that the men and women of America must be refusing to work where they are most needed. Furthermore, the existing governmental manpower policies must have failed. Yet, the fact is that America has demonstrated she is the arsenal of democracy. Record production and significant misuse of manpower are not compatible. This request for control over the work-lives of Americans needs proof. The simple wish of the Army, the Navy and the Maritime Commission for added power is not enough to induce Americans to yield yet another fundamental right.

Some Observations

There is something about this whole idea of a National Service Act which just does not ring true. The need for such drastic legislation has not been convincingly demonstrated. Indeed, there is the strong odor of dictatorial government about it. The pattern was made by the Nazis and the Japs because—we have been told—their workers were not free men and would not voluntarily work to preserve their kinds of government. What are we Americans to believe now?

There is the added peculiarity that for three years American workers have demonstrated what free people can do; yet, now that there is reason to believe that we are winning the battle of production, our freedom is to be circumscribed. Have Americans become so naive that they have intentionally reduced production? Is their belief in democracy so weak that they cannot continue to produce?

There is one final observation. The enactment of the National Service Law is made conditional upon the passage of legislation on the other four proposals—heavier taxation, renegotiation of contracts, effective control of food prices and the renewal of the Economic Stabilization Act. Could this labor-draft proposal have been made to sugar-coat these four pills? This is no time to disparage the contribution of workers to mollify the feelings of others. This recommendation for a labor draft law should be

WAGE ADJUSTMENT BOARD United States Department of Labor Washington

In the matter of
Request for Travel
Expenses

by
Steam Fitters Local
Union 120
and Plumbers' Lo-
cal Union 55
Cleveland, Ohio
To apply on Plan-
cor 244, at
Painesville, Ohio

Decision of
Wage Adjust-
ment Board
Case No. 2296-NB
(Corrected)
Pertaining to
Federal Construc-
tion Projects

Pursuant to the Secretary of Labor's Administrative Order No. 101, as amended creating the Wage Adjustment Board for the Building and Construction Industry, and in conformity with the National War Labor Board's General Order 13 on wage stabilization in building, this decision is entered by the Wage Adjustment Board on its Case No. 2296-NB, wherein the following facts appear:

The Steam Fitters' Local Union No. 120, and Plumbers' Local Union No. 55, of Cleveland, Ohio, requested authorization of transportation expenses from Cleveland to Painesville, Ohio, for their members employed on Defense Plant Corporation Project known as Plancor 244 at Painesville, Ohio, as provided by their current agreement.

On December 8, 1943, after considering the evidence submitted, which included copies of agreements operative for the past several years for the two petitioning Unions, and a comprehensive report from the Wage Determination Section of the Office of the Solicitor of Labor, the Wage Adjustment Board decided unanimously to approve payment of travel expenses to members of Steam Fitters' Local Union No. 120 and to Plumbers' Local Union No. 55 for employees on Plancor 244 at Painesville, Ohio, as provided by the resolution of the Wage Adjustment Board dated November 17, 1943, a copy of which is attached.

Pursuant to the resolution, payment to workmen shall, in each instance, be limited to actual expenses incurred. Where the contractor or subcontractor furnishes adequate transportation, no travel expenses shall be allowed re-

gardless of whether or not an individual workman uses such furnished transportation.

Payment of travel expenses, as provided above for Plancor 244, shall be effective as of the date payment of such expenses on this project was discontinued at the direction of the Defense Plant Corporation.

(s) S. L. Johnson
Acting Executive Secretary
Wage Adjustment Board.

Washington, D. C.
December 8, 1943.

6199
12/30/43

Resolution of the Wage Adjustment Board with Respect to Payment of Travel Expense in the Building and Construction Industry—Passed November 17, 1943

It shall be the policy of the Wage Adjustment Board to approve payment by contractors or subcontractors to their employees of actual travel expense incurred by the employees in those instances where (1) there was in existence prior to October 3, 1942, a properly negotiated collective bargaining agreement providing for the payment by contractors or subcontractors of such travel expenses, or where the local union's working rules provided for the payment of travel expenses by the contractors or subcontractors prior to October 3, 1942, and (2) where prior to October 3, 1942, it was an established practice in the area involved, for contractors or subcontractors to pay such travel expenses and where evidence proves that contractors or subcontractors actually paid such travel expenses.

Payments to workmen for travel expenses shall be limited to actual cost of travel.

Where contractors or subcontractors furnish adequate transportation, no travel expenses shall be allowed regardless of whether or not an individual workman uses such furnished transportation.

Approved by NWLB—November 22, 1943.

12/22/43

Interpretation of Resolution by the Wage Adjustment Board Dated November 17, 1943, Covering Payment of Travel Expense in the Building and Construction Industry

The above resolution shall be considered authority to pay travel expense allowances without prior specific approval from the Wage Adjustment Board, if the conditions therein have been met. In the event a dispute or question arises as to the existence of the above conditions provided by the resolution, the dispute or question shall be referred to the Wage Adjustment Board for its consideration and determination.

INFL-397

Docket No. 38 SHIPBUILDING STABILIZATION COMMITTEE Interpretive Ruling

Zones: All

Subject: Credit for "shift worked" in determining eligibility to sixth and seventh shift premium pay.

Problem: Certain shipyards have raised the following question: Should new construction employees who work, at the direction of management, on other than new construction, such as ship repair or instruction, receive credit for such time worked in determining sixth and seventh premium shifts?

Comment: The managerial discretion of an employer in assigning employees does not affect the employees' regular work week nor their rights to sixth or seventh shift premium pay.

Ruling: When, at the direction of the employer, the employee's time is divided between two or more jobs, time so worked counts in determining "shifts worked."

Concurrence:

Navy Department: Ralph A. Bard,
Assistant Secretary of Navy.

U. S. Maritime Commission and
War Shipping Administration:
H. L. Vickery, Rear Admiral,
U.S.N., Commissioner, U.S.M.C.

War Department: Charles E. Martin,
Lieutenant Colonel, U.S.A.

Report of GENERAL

The general situation in Canada is still very much disturbed regarding the uncertainties of our position.

REPORT OF GENERAL ORGANIZER JOHN W. BRUCE

The government has now issued a new order in council, P. C. No. 9384, in which powers are now granted our National War Labour Board in excess of anything ever granted them previously, which means that they practically take over and control all of our activities regarding wages and working conditions and I doubt if any country in the world is confronted with such an outrageous and vicious order when at a time we are supposed to be fighting for freedom and democracy. I attended a meeting of representatives in respect to the situation, but until we know the full import of the order we cannot take any action to protect our conditions.

I visited Hamilton shipyard and had an interview with Mr. Cameron, general superintendent, and Mr. Moffatt, general foreman, and discussed a number of matters of interest to our membership in the general operation of the yard and found things going along satisfactorily. I attended a meeting of the Executive Board of Local Union No. 67, when we discussed our position in the yard and the question of the welders and came to a satisfactory understanding.

Returning to Toronto, I took up the complaints of a number of our sprinkler fitters with two of the companies and had the matter satisfactorily adjusted. I also contacted the Comstock company regarding the situation at St. John, N. B., and also the question of a national agreement and have made fair progress in these matters. I attended a meeting of the Building Trades Executive and Business Agents respecting an unfair job at Malton and this matter has been left in the hands of our business agent, Brother Martin.

Christmas holidays here intervened and I remained around during this period. I then visited Hamilton and attended the regular meeting of Local Union No. 67 and installed their officers and gave them a review of the general situation and also took up the matter of some of their grievances.

In this connection I visited the shipyard and met Mr. Cameron and Mr. Moffatt and after a full and thorough study of the situation I regret to admit that our members involved were at fault, but out of it we may be able to make some adjustments.

Leaving Hamilton, I visited London and attended a meeting of Local Union No. 593 and gave them a review of the general situation and discussed with them some local problems. I visited one of our leading contractors and discussed with them the conditions in their shop and they have promised action.

Returning to Toronto, I visited the Department of Labour and discussed with them the action of some of the employers refusing to pay the cost of living bonus, and I am of the opinion this matter will be satisfactorily adjusted.

I also attended a meeting of the Ontario

Provincial Apprenticeship Council, and it is gratifying to report that considerable progress is now being made and a more general recognition by employers of the need of a properly controlled apprenticeship system.

I am just now in receipt of the decisions of the National War Labour Board respecting our request for wage increases in various shipyards in Eastern Canada, and I regret to report that I am somewhat astounded by the decisions which in effect in some instances mean a destruction of our wage standards and working agreements and I am now in consultation with the representatives of other crafts and our Local Union No. 46 respecting this situation, and while we are registering a protest on this matter it is too early yet to indicate what our policy will be.

This report has its beginning at Syracuse, N. Y., where I attended a joint Sunday

REPORT OF GENERAL ORGANIZER E. W. LEONARD

meeting of the Plumbers' and Steam Fitters' representing Local Unions No. 54 and No. 818. The important subject before this joint gathering was amalgamation of the two local unions into one body of journeymen. This matter was discussed at length. The Journeymen Plumbers were in favor of this consolidation and unity. The Steam Fitters have so far withheld their determinations, but it is expected that action will be taken by them later on.

In New York City, in conjunction with the officers of the B. and C. Branch of Local Union No. 638 I met some of the members of the Conciliation Board of the U. S. Labor Department, but the matter was deferred for another conference because of the failure of the national representative of the Retail Clerks to be present at this meeting. I again returned to New York City on December 29, 1943, by request, to again take up with the Conciliation Board this case of Branch B. and C. of Local Union No. 638 vs. Retail Clerks. I arrived just as the meeting adjourned because of a three-hour delay in train service. Nothing was done at this meeting, but the findings are going to be submitted to some Federal Board of Conciliation.

At Syracuse, N. Y., with Agent Shannon of Local Union No. 818, I went to a new construction job, where the Hoisting Engineers were claiming the right of firing a low pressure boiler, the steam fitters maintaining temporary heat in the buildings. The pressure on this boiler, cast iron, model type of the American Radiator Company, is limited to 15 pounds, and I instructed the members of the United Association firing this boiler to continue doing so irrespective of the claim of the engineer.

At Albany, N. Y., for a few days I attended conferences between General Organizer Gar-

rett and myself, and at their conclusion attended a special meeting of the Plumbers' and Steam Fitters' Local Union No. 7. We were privileged to address the members and submit an auditor's report on the financial affairs of Local Union No. 7. This report showed that every dollar collected by the officers of this local union, for all purposes, was properly recorded and the auditor complimented the local union on its fine work.

In New York City for a few days, I will report on two principal matters. First, a conference in Brooklyn, N. Y., with the officers of the Navy Yard Local Union No. 711. Among those present were officers of Local Unions No. 1 and No. 354 of Brooklyn, also officers of the Metal Trades Department. Local Union No. 711 is a small local union, but always vigorous in trying to secure and maintain their justified and charter rights covering all of the navy yard, but unfortunately, are not receiving support that they are entitled to from our United Association locals in Greater New York and vicinity. All these matters were discussed at this meeting, and at its conclusion, and because of the attitudes of those present, I am of the opinion that better cooperation will soon be apparent in the interest of Local Union No. 711.

I attended a special meeting of Branch B and C of Local Union No. 638. This was a large meeting. These branches have now approximately 600 members, with two business agents. It was my privilege to obligate a score of new members, after which I made a short address and then listened attentively to the reports of the business agent, which indicated that real and continued progress is being maintained on all their fronts, including financial growth.

I am submitting this report without detailing many small incidents, feeling that the membership will be satisfied to read of the chief incidents that I have reported upon.

In compliance with the wire sent me by General President Durkin of the United Association, I went to Salt

REPORT OF GENERAL ORGANIZER E. B. FITZGERALD

Lake City in order to be present at a meeting of the War Labor Board, presided over by Judge Knouse. At this meeting there were 11 national representatives as well as three organizers of the American Federation of Labor. Also Brother Rudolph Fouple, a special representative of President Green of the American Federation of Labor, to aid in the establishing of a wage scale for the production employees at the Geneva Steel Plant near Provo, Utah. After the conclusion of this meeting, several meetings were arranged of the Utah Metal Trades Council where plans were adopted for the organization of those production workers. I may also say to

ORGANIZERS

all of our local unions of the Metal Trades organizations they will have to do their share in order to assist in the organization of those production workers. A report of this matter has been sent to General President Durkin of the United Association. During our visit to Salt Lake City, we accepted an opportunity of visiting the Geneva Steel Company plant at the invitation of Messrs. Spivey and Neilson, and we had an opportunity of seeing this entire project during its construction.

Returning to Salt Lake City, I attended the regular meeting of Plumbers' and Steam Fitters' Local Union No. 19, and explained to them in detail the method of organizing those production workers, and I know that our local union will do their full share in order to have this plant organized 100 per cent A. F. of L. The following morning, in company with Business Representative Anderson of Local Union No. 19, we visited the Utah Oil Company project where we contacted Messrs. Houston and Mendenhall of the Kellogg company in reference to maintaining our jurisdiction over the rigging of pipe. Later, a meeting was arranged by Mr. Houston with National Representative Hurlley, of the Iron Workers; Secretary Noller, of the Salt Lake Building Trades Council; Colonel Peterka, of the War Department, of Washington, D. C., and Mr. J. E. Rouse, of the War Manpower Commission and an understanding was reached that the work be done by the United Association.

While at Salt Lake City I received a long distance phone call from Secretary and Business Representative Graves of Local Union No. 20 of Pueblo desiring my services at once as he informed me that his local union was having some difficulty with the iron workers over the rigging of pipe on the Colorado Fuel and Iron Company job. So, leaving Salt Lake City I went to Pueblo and was informed by Business Representative Graves that the situation had been adjusted and the membership of his local union is now doing all work.

Returning to Denver, I received a telegram from General President Durkin of the United Association for me to return to Salt Lake City and meet with Special Deputy W. T. Matthews, of Bricklayers, Masons and Plasterers of America, as well as Business Agent Evans of Bricklayers' Local Union No. 1 of Salt Lake City, in reference to a condition of importance to Local Union No. 19 and the United Association. The following day I attended a meeting at the Geneva Steel plant, presided over by Mr. Sheik, the manager of the Geneva Steel Company. All of the officials of the several prime contractors, as well as the officials of the general and sub contractors were present, as well as Mr. Mayor, of the U. S. E. S., and Lieutenant Colonel Peterka, Chief Material Branch Production Division, Army Air Force. This meeting was arranged to discuss the situation caused by the shortage of pipe fitters, bricklayers and laborers on the high octane oil refining company project for the Utah Oil Company at Salt Lake City, as Donald M. Nelson, of the War Production Board, ordered to re-schedule the completion of the

Geneva Steel plant and the necessary number of pipe fitters, bricklayers, laborers and other crafts be transferred from the Geneva Steel job to the high octane refinery. Upon its completion they will be again transferred back to their original jobs at the Geneva Steel plant. From the action of Donald M. Nelson, one can realize the necessity and the importance of high octane gasoline at this time.

Receiving a call from Secretary and Business Agent Reynolds of Local Union No. 192, Cheyenne, Wyo., I went to Cheyenne. Brother Reynolds and the writer got in contact with Mr. Neuman, vice president of the Frontier Refining Company. Our purpose in calling upon Mr. Neuman was to discuss with him the established rates of pay for pipe fitters employed by his company. Rates were agreed to which will be submitted to the War Labor Board for approval. We got in contact with Mr. Winn, superintendent of Flour Corporation, as there were several matters I desired to discuss with Mr. Winn and the job steward as my attention had been called to the fact that other trades were doing work that came under the jurisdiction of the United Association. However, in making a personal survey of this situation, I found that this work is now being done by the membership of Local Union No. 192, and it is to be hoped that there will be no recurrence of this situation as surely our members should know the jurisdiction of work that is claimed by the United Association.

By previous appointment I returned to Pueblo where I attended a regular and special meeting of Local Union No. 20, as there seemed to be a misunderstanding among the membership of this local union in reference to the election of officers, and while the local union and its members, prior to the defense work starting, elected their officers for a period of three years, this time had not yet elapsed, but I instructed the officers and members how best to handle that situation in keeping with their local by-laws and the constitution of the United Association. I also had the privilege of discussing with our members several matters I think is of importance, not only to them and their local union but to the United Association as well.

Returning to Denver, I got in touch with Business Representatives McDonough of Plumbers and Steam Fitters Local Union No. 3, and Donner, Steam Fitters' Local Union No. 208, regarding a question that had arisen on the fabrication of work for the landing barges. The three of us visited this site and after a thorough discussion this matter was adjusted to the satisfaction of both local unions. Receiving a letter and long distance call from President Cahill, of Wyoming State Federation of Labor, requesting me to be in attendance at a meeting he had arranged to meet with the representatives of the Kewit and Son Construction Company at Laramie, Wyo., I went there and met with President Cahill and later met with Messrs. Voss and Nelson, and we learned that Mr. Voss will be the superintendent on the construction of an office building and warehouse for the proposed aluminum company to be

erected near Laramie. While we did not conclude our negotiations with Mr. Voss, we have arranged to meet with him again in order to bring about an understanding that this job will be operated on 100 per cent union basis, American Federation of Labor. While in Laramie, we met with Mr. Anderson, superintendent of the Monolith Cement Company, in order to discuss with him many situations in reference to the erection of the aluminum plant. We also met with committees of the several local unions at Laramie.

E. B. Fitzgerald

By instruction from the General Office, a visit was made to Quincy and Braintree, Mass., where in the company of Business Agent, Brother Percy Richards of Quincy Local Union No. 275, a small hospital job was visited, that comes within the control of the War Production Board,

REPORT OF GENERAL ORGANIZER A. A. GILLIS

the job having been previously visited by an inspector of this Federal agency to investigate the matter of the steam fitters employed during the day, servicing the boiler and temporary heat after hours on a single time basis. A report of my investigation has been submitted to the General Office to be taken up in detail with the War Production Board.

At the request of Fitchburg, Mass., Local Union No. 92, a visit was made to this city, where in the company of Business Agent Brother Harold Corkum a meeting of the board of Business Agents of the Fitchburg Building and Construction Trades Council was attended, and an opportunity was afforded to discuss with the officers of the council matters of importance to the building trades. In the company of Brother Corkum, visits were made to the offices of employers to take up with the management of the concerns matters pertaining to the interests of members employed by the concerns. Other visits will be made in the near future to go into the matters involved, whereby it is expected that closer business relations will be established.

A meeting of Lynn, Mass., Steam Fitters' Local Union No. 277, was attended, where I was privileged to install the newly elected officers and to discuss with the members many matters of interest concerning the future welfare of our United Association members within the jurisdiction of Plumbers' Local Union No. 77 and Steam Fitters' Local Union No. 277, all of which was received with appreciation.

Conferences have been held with Business Agents, Brothers Tim Callahan of Boston, Mass., Plumbers' Local Union No. 12, and Tom Kelly of Steam Fitters' Local Union No. 537, at which times advice and instructions were given them concerning certain problems connected with the arrangements for the employment of their members, and other matters

of importance to the future welfare of these locals.

On my visit to Springfield, Mass., a meeting was held with President Brother Joe Scanlan, and Business Agent-Secretary Tom Egan of Plumbers' Local Union No. 89, and Business Agent Bill Morris of Steam Fitters' Local Union No. 603, and Business Agent John Burke of Holyoke Plumbers' and Steam Fitters' Local Unions No. 233 and No. 622, when matters concerning the interrelations between these locals were discussed in detail. The employers of both cities are at times successful in procuring contracts in the other locality, and the matter of sending members into the jurisdictions of each local has caused some misunderstandings, that arrangements to overcome will have to be devised. Other visits will be made, and joint meetings of the officers of the several locals will be arranged to clear up the situation at an early date.

In meeting with Senior Field Representative David A. Goggin and Associate Field Representative Martin Salmon (both of whom are members of the United Association) of the Federal Security Agency, Apprenticeship Section, an opportunity was afforded to discuss with them the progress now being made by this Federal agency, as it pertains to the pipe fitting industry. These brothers were pleased to point out to me that our locals in many instances were aware of the advantages of now making preparations to reinstate the Federal Program of Apprenticeship Training that had necessarily been curtailed because of the war effort, with so many of the young men within the apprenticeship age limit having gone into the armed service. These capable Federal representatives are doing an excellent job, and are at the service of any of our Massachusetts locals contemplating the establishing of the Federal Training Plan as endorsed by the United Association, and what has been stated above applies to Field Representative of the Security Agency, Brother "Bill" Harrison, who covers the State of Connecticut, who has done very excellent work with the United Association locals, and other organizations within this State.

On my visit to Worcester, Mass., several matters were taken up with Business Agent Brother Dick Donnelly of Local Unions No. 4 and No. 408, concerning the interests of the plumbers and steam fitters of these locals. A meeting of Steam Fitters' Local Union No. 408 was attended and the members were informed on some matters coming within their agreement with their employers and other matters affecting the progress of the trade. From my discussion of the Apprenticeship Plan with the officers and members of Local Union No. 408, it is evident that they are thinking and acting in accordance with good judgment, in that they have concluded that the post-war period looms in the near distance and they have taken time by the forelock, so to speak, and have through joint activity with the employers practically consummated an agreement on the apprenticeship setup. This good work is to the credit of Business Agent Brother Dick Donnelly and the field representative of the agency.

During my visit to Hartford, Conn., a meeting was held with President Brother Frank McCormack, Business Agent Brother John O'Donnell and Brothers Jimmy Devine and Jimmy Deady of Plumbers' Local Union No.

76, when matters that Brother Devine wished to take up with the organizer were gone into. As the matter of the discussion involved the attitude and actions of our members on certain jobs, President McCormack supplemented my instructions and advice with intelligent words and an attitude of reason and fair play toward the employer in approaching problems confronting members acting in the capacity of stewards on building operations.

At the request of Hartford, Conn., Steam Fitters' Local Union No. 218, a meeting of the Executive Board was attended, and several matters concerning the interests of the members of this local were gone into in detail, with questions answered and problems solved to the satisfaction of the officers.

On invitation of Boston Plumbers' Local Union No. 12, a meeting was attended, and after the newly elected officers were obligated by the writer, I discussed with the officers and members present trends and post-war conditions as they may affect our pipe trade industry.

A joint meeting of the Executive Boards of Boston Plumbers' Local Union No. 12 and Steam Fitters' Local Union No. 537, was attended, when I advised these officers concerning the mutual interests of both locals and how best to approach some of the problems that they had asked my advice on.

A. A. Gillis

A communication addressed to General President Durkin from Business Manager Frozina of Local Union No. 367, Anchorage, Alaska, who complained that in the recent adjustment of journeymen plumbers and steam fitters wages by a board composed of civilians on wage

adjustments in the Alaska territory out of the Seattle, Wash., office, they did not take into consideration foremen's rates as has been the custom in agreements between the membership of Local Union No. 367 and their employers. The wages paid to foremen was always 25 cents per hour over the journeymen's rate. We filed a complaint with Major William A. Mowery of the Corps of Engineers, Executive Officer for Labor Relations, Washington, D. C., that the wage rates for foremen should be corrected. We received an acknowledgment that a report was made to the proper authorities for their decision and we would be further advised. A copy of this report was forwarded to our Local Union No. 367, Anchorage, Alaska.

The writer received a complaint from the office of Mr. Ray Kirkpatrick, Director of Labor Relations, Federal Works Agency, on the hospital project now under construction at South Weymouth, Mass., in regard to temporary heat. This complaint was taken up with General Organizer A. A. Gillis to have him make an investigation and submit a report which was done and same was filed with the agency for their approval.

Brother William J. Robinson, secretary of Local Union No. 420, journeymen steamfitters, Philadelphia, Pa., addressed a letter to the General Office outlining a dispute on the

work in connection with the Pennsylvania Railroad station, located at Broad and Market streets, Philadelphia, Pa. The point raised by the Plumbing and Heating Contractors' Association was that the installation of work in connection with the plumbing and heating came under the jurisdiction of the Stabilization Agreement, which the United Association is a party to, but the local union's representatives claimed that the project under construction did not come under the Stabilization Agreement. This matter had been referred to the writer and a complaint was filed with the chairman of the Board of Review for his investigation and decision. We received the board's report, copy of which we forwarded to Local Union No. 420 for their future guidance.

Secretary-Treasurer Edward J. Hillock received a letter from Local Unions No. 55 and 120, Cleveland, Ohio, bringing to the attention of the General Office that the Republic Steel project has been under construction for more than one year and they desired to have their present wage rates, approved by the Wage Adjustment Board, applied on this project, under the Stabilization Agreement. This matter was referred to the writer, who made application to the Wage Adjustment Board, also held a conference with the Labor Relations officials of the Defense Plant Corporation, explaining to them the request made by our local unions and that we should have their sanction and approval by a letter being directed to the Wage Adjustment Board and this request was granted and at this writing we are awaiting the decision of the Board.

We received a letter from Secretary Barber of Local Union No. 123, Meridian, Miss., in the form of a complaint as to the wage rates now being paid plumbers, steamfitters and helpers at Key Field, Miss., and same was referred to the writer for investigation. The writer, by appointment, met with Major Wm. A. Mowery, Corps of Engineers, Executive officer for Labor Relations, and he stated he would submit our complaint to the Air Force Chief, Civilian Personnel Division for reply. Upon receipt of a reply to our complaint, same was sent our Local Union No. 123.

By assignment from General President Durkin, the writer met with General Organizer E. W. Leonard in Albany, N. Y., to meet with the officers of Local Union No. 7, regarding a violation of the Constitution and By-Laws of the United Association against Fred G. Whitmore, the business representative of Local Union No. 7 of Albany. This case was heard by the General Executive Board at their meeting in November, 1943, and a decision was rendered by the board in this case. We explained to the officers of the local union all of the evidence presented to the board by numerous witnesses, but because of Brother Whitmore's absence from this meeting due to his being confined to a local hospital on account of illness, we were unable to proceed further with the case and deferred any action at the meeting of the local union until he was able to regain his health, so as he could be present. This required another visit to Albany and we had an opportunity to meet with the members in regular meeting and made recommendations which were approved and accepted by the local union. The report by the auditor of the finances of the local union was very commendable.

Business Manager William Doran, George O'Shaughnessy and Saul Heisler, visited the General Office in regard to matters concerning construction work in their area. It was necessary for the writer to make arrangements with the chairman of the Board of Review, Louis K. Comstock, to discuss with him the several matters the representatives of Local Union No. 2 desired information on and they received instructions if they desired to make a complaint on the question at issue.

M. F. Carrell

My last Journal report was submitted from Jacksonville, where I advised with Business Representative Leo Hill and the Executive Board of Local Union No. 234, on their misunderstanding as to the eligibility of officers to be elected in the shipyards, and who were eligible to vote in their local union and the Marine branch of Local Union No. 234.

**REPORT OF
GENERAL
ORGANIZER
G. W. STROM**

Local Union No. 188 of Savannah, Ga., served notice on their employers that they would cease to work for them at the end of the 30-day period unless they signed an agreement. I am glad to report that this agreement was signed, and Local Union No. 188 is now working under a closed shop agreement in their vicinity.

Then to Brunswick, where I met with the officers of Local Union No. 177, and advised with them on their many problems resulting from bad management of the previous officers, and I am glad to report to you that the new officers are doing a splendid job.

In Tallahassee I met with Business Representative Parke Glover of Local Union No. 592, and with him paid a visit to Panama City where we visited several jobs. Later we met with Business Representative Falk and Executive Board of Local Union No. 229, where advice was given on several matters pertaining to the shipyards. While in Panama City, Business Representative Falk and the writer also paid a visit to the shipyard, and contacted management; and I was agreeably surprised to learn that our local union was very, very highly thought of and respected.

Then to Tampa, where I met with Business Representative Charles Bradford and the Executive Board of Local Union No. 766, and I am satisfied that a complete understanding was reached with the officers on their factional quarrels; and if carried out, will be of great benefit to their local union.

This report will conclude my activity in my district for a few months, because of ill health for the past year. The office has granted me a six months leave of absence, and our mutual friend, Sam Roper, business representative of Local Union No. 760, of Sheffield, Ala., and president of the Alabama State Federation of Labor, will take over the district the first of January, and I sincerely hope that the local unions will give him the same wholehearted support that has been given me.

G. W. Strom

Upon my arrival in Pasco, Wash., I received information from several United Association members that

**REPORT OF
GENERAL
ORGANIZER
W. C. O'NEILL**

Brother Jole Carling (now deceased) lay in his room in the barracks for days before receiving doctor attention and it was necessary for a committee of United Association members to confer with Mr. Wm. Hankee of the Hankee, James, Zahniser and Warren Company, the piping contractor on the E. I. du Pont de Nemours project at Hanford, Wash., to arrange to have Brother Carling admitted to the hospital on the project. I visited the project and met with Mr. Hankee and Mr. James on the question of doctor attention and hospital service for our members and later I attended a meeting in our Pasco office with Mr. Hankee, Brothers Larish, Penock, Merz, Bedwell and Fabian. Mr. Hankee had appointed Brother Fabian first aid representative, and it is understood any United Association man who may become ill, his foreman or any United Association member is to notify Brother Fabian who will render all possible assistance in securing medical attention for our members.

I held several meetings with Mr. Hankee and Mr. James, and discussed the advisability of having the contractors' labor expediter upon arriving in a locality to confer with the United Association business representative and jointly arrange clearance of our members to the project. I also met with Mr. Church, Du Pont project manager, and Colonel Harry R. Kadlec and Major Newcomb of the U. S. Engineers, and requested that all United Association members employed by other plumbing and heating contractors on the Du Pont project be covered by the so-called incentive plan pertaining to coach fare. It was agreed the request was reasonable and every effort will be made to comply with the above request.

I also conferred with a number of United Association members and arranged a special meeting in the Pasco High School of the United Association members employed on the Du Pont project at which meeting current conditions were discussed. At this special meeting Brother Vice President Harry J. Ames and the writer explained to our members that the United Association General Executive Board took action on assessments and as this project is in isolated territory the members will pay their dues to their home local union and no working assessments will be charged our members employed on the project for the purpose of supporting the Pasco office. Under the present setup the expense of the business representative and other necessary help and other incidental expenses will be financed by the United Association and under this plan only bona fide members of the United Association will be cleared to the project through the Pasco office.

Here I learned Du Pont representatives in some cases were changing instructions given the United Association journeymen by their foremen and superintendent. It was also stated the Du Pont representatives were making decisions which resulted in the allocation of work to other crafts that should be installed by United Association members,

and one of their representatives in charge of transportation was issuing orders to United Association journeymen steam fitters usurping the authority of the foremen and superintendents of the piping contractor. There was considerable discussion on the question of discrimination against shop stewards by those in charge of pipe work, when the stewards in question were insisting on observance of jurisdictional claims of the United Association. Our members also complained of riding in cold busses not adequately ventilated. It was stated that it was impossible to purchase locks for their rooms and clothes lockers in the barracks. The subject of selecting foremen and superintendents was discussed at the meeting and considerable discussion was entered into on the question of installing a local union in the Pasco area.

Brother Business Representative Larish, who met with an automobile accident, was confined to his home and was unable to take up the subjects in contention. I again visited the project where I met with Mr. Wm. Hankee and Piping Superintendent C. W. Betts and took up the questions complained of at the meeting: The interference with installations and changing of instructions to United Association members by Du Pont personnel and also the subject of jurisdiction of work. I also sent Mr. Hankee a letter stating the United Association would not be responsible for any retarding of work if the condition was not rectified. All the subjects including the important matter of shop stewards being discriminated against were taken up and Mr. Hankee and Mr. Betts stated they would issue a field letter that foremen will direct the journeymen under their jurisdiction and superintendents to direct the foremen only. It is also agreed that coordination between transportation and its heads and the field will be negotiated through field supervision, no orders being given to journeymen by transportation representatives.

Mr. Hankee and Mr. Betts would not agree to a roving shop steward, but stated they did not know of any discrimination against shop stewards, and further stated that it is the moral duty of any United Association man to report to his union representative any infringement on jurisdiction of United Association work and any men making such a report would not be discriminated against. The piping contractors' representative stated he would arrange to have locks available for purchase at the store on the project for the clothes lockers, but on the question of lock for the rooms in the barracks, they were not in a position to comply with this request. I also discussed the complaint on the method of selecting foremen and superintendents and pointed out that several highly qualified men had quit the project because they felt that favoritism was shown to others who had not had any previous experience in supervising over large groups of men.

The question of cold and badly ventilated busses was one of the several items of complaint that Mr. Hankee and Mr. Betts could not rectify. However, with Mr. Hankee I called on Mr. Church, the Du Pont project manager, and discussed the question of cold busses, and Mr. Church stated that they had ordered large heaters for the busses and they would be installed as soon as possible. At this conference I also discussed the matter of the company's personnel giving orders to

United Association journeymen and making decisions on jurisdiction of work. Mr. Church agreed that their representatives should take up any change of work with the contractors' representatives, and further stated he would abide by decisions of the A. F. of L. on jurisdiction of work. At the special meeting a large group of members signed a petition requesting a charter be installed in the locality and before recommending such a step to General President Durkin and General Secretary-Treasurer Hillock at this date, I would want to be assured that it would not be a local installed for the job only, and before any definite recommendations are made I would want to be reasonably assured that a substantial number of members and officers would be composed of men who intended to reside in the vicinity of Pasco permanently. The question of jurisdiction of work would have to be entered into and some understanding reached.

While in Pasco I met with Mr. Harges and Brother Vanderbilt of the A. D. and H. Plumbing and Heating. This firm has the contract on a large housing and transit hotel project for the Du Pont Company at Richland, Wash. I also arranged to meet with Mr. Berglund, personnel representative of the general contractor, for the purpose of discussing with Brother Business Representative Larish, who had just returned to his duties, several controversial issues pertaining to securing men for the A. D. and H. Company on the Richland project. I also met with representatives of the A. G. Rushlight Company of Portland, Ore., who have a contract in Richland for a good sized hospital for the Du Pont Company.

In Seattle, I met with Brothers Harry Busch, business representative of Local Union No. 32, and George Nethercut, business representative of Local Union No. 473. With them I visited the office of the U. S. Engineers, where we conferred with Mr. Chester Ross, personnel representative, in charge of U. S. Army projects in some parts of Alaska, including projects on the Aleutian Islands. This visit was for the purpose of discussing the advisability of arranging to establish the Seattle wage rate on several projects to be constructed on the Aleutian Islands by Seattle contractors, including the premium pay for men employed on islands considered by the War Department to be in the combat zone. While there I also discussed with Mr. Ross the wage rate of \$1.75 per hour for members of the United Association local in Anchorage. Mr. Ross would not agree to recommend the \$1.75 per hour wage rate. However, I pointed out the predetermined wage rate of \$1.68 per hour in Anchorage, and some contractors were not complying with the predetermined wage rate. Mr. Ross agreed to investigate this situation.

While in Seattle I attended the regular meeting of the Executive Board of Local Union No. 473, at which time I had the opportunity of discussing several problems before the board.

In Tacoma, I met with Brothers Business Representative Leonard Carlson and Secretary Howard of Local Union No. 82. While in Tacoma I attended the regular meeting of the Executive Board and also attended the regular meeting of the local union.

I met with Brother Business Manager John Gillard and Business Representative Bill Nichols of Local Union No. 235 of Port-

land, Ore. With Brother Nichols I visited Astoria, Ore., where I met with a committee representing Local Union No. 573. The committee informed me that the Navy Section Base at the Port Docks were doing construction work with Civil Service men at a rate far below the building trades rates. I met with Lieutenant Commander Butzine, Public Works officer, and learned that several small projects were installed by Civil Service men, but was assured that a job of considerable size was about to be let out to contractors.

While in Astoria with Brother Nichols of Local Union No. 235, I attended a conference with the officer in charge of pipe work aboard several aircraft carriers which were constructed in Vancouver, Wash., and some changes were being made for the Navy by the shipbuilding company on the carriers in the Navy Docks at Astoria.

With Brother Nichols, I next visited Portland where I again conferred with Brother Business Manager Gillard and Business Representatives Van Hoomissen, Howard, Joy, Hoyle, Young, Sullivan, McGrath and Nichols. I visited the office of Local Union No. 590 in San Francisco and met with Brothers Secretary Jack Maloney, Assistant Secretary John Gasman, Business Manager Druhan, and Business Representatives Cy Dempsey, Dewey Green, Gunboat Smith, Tom Moss, Mike McCabe, and Gus Katsarsky, and advised with the representatives on the policy they should follow in the election called by the N. L. R. B. in the Bethlehem Alameda shipyards in Alameda. I also made visits to the Alameda shipyard with Business Manager Druhan and the United Association representative at which time the representatives had two good sized signs placed in a convenient place and passed out hand bills to the employees at the change of shifts which resulted in the Bay Cities Metal Trades Council winning the election for bargaining rights for the employees in this recently converted shipyard.

While in the San Francisco Bay area. I met with Secretary-Treasurer Clayton Bilderback of the California Pipe Trades Council.

With Brother Business Representative French of Local Union No. 342, I visited the office of the Pacific Gas and Electric Company and met with Personnel Manager Louis J. Nevraumont. The purpose of this conference was to arrange to furnish steam fitters' members of Local Union No. 342 on casual employment jobs at the prevailing wage rate of the local union.

Brother Business Representative Jim Matheson of Local Union No. 159 requested my services, and with him I visited several projects in Contra Costa County where questions in contention were settled. While on one large project I met with Brothers Larry Hench, now in charge of inspection, and Ray Foley, who is in charge of the Santa Fe housing job.

Brother Dan MacDonald, business representative of Local Union No. 393, was having a controversy over Civil Service men installing new work on a large hangar at Moffatt Field, Sunnyvale, Calif. With Brother MacDonald I called on the officer in charge and we did not receive any assurance that the practice of using Civil Service men on new construction work would be stopped. Brother MacDonald has forwarded compiled infor-

mation on the project to General President Durkin requesting a protest be made to the Navy Department in Washington.

I met with Brothers L. French and Curly Davis, business representatives of Local Union No. 342 of Oakland, and took up several matters pertaining to maintenance work in several shipyards and the Pacific Gas and Electric Company power plants. I also met with Brother Sam Donohue, business representative of Local Union No. 44 of Oakland, on a question of the interpretation of a section of the local's working rules pertaining to transportation and expenses on out of the city work.

W. E. O'Neill

My attention was called to a dispute between Local Union No. 172 and the C. I. O.

REPORT OF GENERAL ORGANIZER CUNNINGHAM

maintenance men on the Studebaker plant in South Bend. Accompanied by Business Representative Ted Turnock I called at the plant and looked over the work in dispute and later we met Mr. Darling of the Defense Plant Corporation and discussed the case with him. We were unable to reach an understanding and we decided to take some other action in the matter. I attended the regular meeting of Local Union No. 172 and had the privilege of speaking to those present on several matters.

Returning from South Bend I stopped at Hammond and met Business Representative Ed Dwyer of Local Union No. 597 and President Burr Burnham of the Indiana State Pipe Trades Association. The annual four state conference was held at the Hotel Schroeder in Milwaukee. It was a very well attended meeting with delegates present from Indiana, Illinois, Wisconsin and Minnesota. Business Representative Charles Kern of Local Union No. 440 of Indianapolis acted as chairman, with President Wm. Arndt of the Wisconsin Pipe Trades Association presiding later in the day.

Many problems facing our local unions were taken up for discussion. All present agreed to carry out the policy laid down by the conference on the various problems before it. General Vice President Peter Schoeman was present and took part in the discussion, while Brother Art Olsen of the Wisconsin State Federation of Labor explained many of the problems confronting our members in the shipyards.

From the conference I went to Chicago where I met General President Martin Durkin and had an opportunity to discuss several matters with General Secretary Edward Hillock on which I had received correspondence from his office.

In Green Bay I attended a conference held in the Northland Hotel with the officials of the Kewaunee Ship Building Company and several international officers, along with Brother Art Olsen representing the Wisconsin State Federation of Labor. This meeting was held for the purpose of renewing an agreement.

I then went to Sturgeon Bay and contacted Secretary C. VanTassel on a matter referred to me by the General Office.

In Eau Claire a meeting was held with the officers of Local Union No. 385 and a member who complained to the General Office on several matters. After looking over the minutes of the meeting held by the local and the financial reports of the certified public accountant I found the charges made by the member were groundless and so notified the General Office.

Receiving notice Local Union No. 11 was having some trouble in the shipyard at Duluth on the question of welding, I left for Duluth and accompanied by Business Representative Ernie Jacobson and Brother Andy Ponti, the steward in the yard, we met Martin Kreips, International Representative of the Boilermakers, along with the local representative.

After a lengthy conference an agreement was reached where our jurisdiction was recognized. While in Duluth I held a meeting with the Executive Board of Local Union No. 11 and two of the officers of Local Union No. 434 of Superior. Many questions of importance dealing with work in the shipyards in that locality were taken up. The question of the locals sending delegates to the zone conference was agreed to. Secretary Tom Wilbacher of Local Union No. 11 was unable to attend the meeting as he was confined to his home with an attack of the flu.

In St. Paul I met Business Representative Jack Dempsey and Jerry O'Donnell of Local Unions No. 34 and No. 455 on several matters and in Minneapolis a conference was held with a group of employers in the oil burner and stoker industry and Business Representatives Irving Miller and Ed Fleming of Local Union No. 539. This meeting was for the purpose of reaching an agreement between the two parties on wages and conditions in the industry. As no agreement could be reached it was decided that another meeting would be called after the holidays. Several matters were taken up with Business Representative Austie McNerney of Local Union No. 15 dealing with Local Union No. 455. At the request of Secretary Ed Berent of the Minnesota Pipe Trades Association, I met Brother Wm. Cannon, secretary of the State Plumbers' License Board, and himself to take up several matters in the interest of the State Association. As the work has been falling off in parts of this district I have been advising our members to leave for some of the jobs that the General Office has been trying to man in cooperation with the Federal Government.

At the request of Local Union No. 553 I went to Wood River and met the officers of the local regarding a clause in their agreement with the Shell Oil Company concerning seniority in the plant. It was agreed after some discussion to work out some plan whereby none of our members would be discriminated against.

Thos E. Cunningham

Let's All

BACK THE ATTACK

Closed my last report in Springfield, Ohio, from which city I proceeded to Charleston, W. Va., where I attended

**REPORT OF
GENERAL
ORGANIZER
FERGUSON**

the Executive Board meeting of steamfitters of Local Union No. 522. On the next evening I attended the Executive Board meeting of Plumbers' Local Union No. 651. On the next evening I attended a special meeting of Steam Fitters' Local Union No. 522. This local union having a number of problems on which they desired advice, I explained the laws of the United Association which should guide them in making any adjustments or changes in their local union and also discussed with them the maintenance of their obligation in any agreements that they were a party to as members of Local Union No. 651 prior to the separation of that local union in Charleston.

There being a job in controversy at St. Albans, W. Va., a non-union contractor having secured a contract for the plumbing and heating on a recreation building for a housing project in that city, our local unions in Charleston that hold jurisdiction over that area were unable to reach an understanding that would provide for this contractor operating under union conditions. In company with Business Representative Calloway of Local Union No. 522, steam fitters, and Business Representative Kirkland of Local Union No. 651, plumbers, the writer proceeded to St. Albans and secured a conference with Mr. Bonham, plumbing and heating contractor involved. An agreement was reached satisfactory to Mr. Bonham, the representative of Local Union No. 522 and the representatives of Local Union No. 651, it providing for complete observance of the rules of those local unions.

Returning to Charleston, I attended a special meeting of Local Union No. 651. This meeting concurred in the agreement made with Mr. Bonham and voted to furnish his firm men under the conditions as set forth in our understanding.

Receiving instructions from General President Durkin that my presence was required in Houston, Texas, in relation to a controversy that had developed between Local Union No. 214, steam fitters, and the United Association in that city, I proceeded there. Arriving in Houston, I contacted General Organizer Switalski and conferred with him and the business representatives of Local Union No. 195, regarding the controversy. At the request of Organizer Switalski the writer, in company with Business Representative Reed, of Marine Pipefitters' Local Union No. 682 of Houston, went to the Houston Shipbuilding yards where I conferred with the men employed in the copper shop of that shipyard. The International Association of Sheet Metal Workers having laid claim to the fabrication and installation of copper piping, I explained that this work, as all other types of pipe work, properly comes under the jurisdiction of the United Association, and made arrangements for copies of the jurisdiction claims of the United Association.

With General Organizer Switalski, General Organizer McCartin and Business Representative Quinn of Local Union No. 195, I conferred with the attorneys representing the United Association and Local Union No. 195

pertaining to the action brought by Local Union No. 214, steam fitters, against the United Association and Local Union No. 195. The court decided to defer the hearing on this matter until January 5, 1944.

Hoping this report meets with the approval of the membership.

A. Ferguson

Returned to Chicago from the East. Handled necessary correspondence, most of which dwelt with the settling of controversies with the Boilermakers' International Officers.

**REPORT OF
GENERAL
ORGANIZER
J. J. MCCARTIN**

Met with General Secretary-Treasurer Edward J. Hillock, who was in Chicago on business of the United Association. While in the city he visited the officers of Local Unions No. 597, United Association, and No. 130, United Association, and I accompanied him.

General President Martin P. Durkin came to Chicago for the purpose of attending scheduled meetings with the joint committees representing the United Association and the Sheet Metal Workers. Also meetings which were held between committees representing the Master Plumbers Association, the Heating, Piping and Air Conditioning Contractors' National Association and the two United Association Industrial Relations Committees representing the Plumbers and Fitters.

I also attended these meetings and acted in the capacity of secretary to both United Association Industrial Relations Committees.

Other members of the United Association who were in attendance at the above meetings and comprised the Plumbers Industrial Relations Committee were: General Vice President Peter T. Schoemann, of Milwaukee, chairman; General Vice President William J. McLaughlin, of Brooklyn, and Business Manager William Quirk of Local Union No. 130, United Association of Chicago.

Also in attendance representing the Fitters' Industrial Relations Committee were: Business Manager Charles M. Rau of Local Union No. 597, United Association of Chicago, chairman; Vice President Leo A. Green of Pittsburgh and Business Manager Robert Lynch of Local Union No. 274, United Association of Jersey City.

The highlights of the meeting with the Sheet Metal Workers' Committee were:

The United Association Committee presented to them a fair and equitable plan of agreement whereby the Railroad Pipefitters, who are now members of the Sheet Metal Workers' International, shall be turned over to the United Association, as in keeping with the decree of the Executive Council of the American Federation of Labor.

And further that the Sheet Metal Workers' International shall recognize that pipefitting in its entirety along with the handling, setting and erecting of all appurtenances and equipment, which are a vital and necessary part of a plumbing and pipefitting system, will be the work of members of the United Association.

This proposed agreement also set out and

recognized sheet metal work of ten gauge and lighter, including sheet copper work, as the work of the Sheet Metal Workers.

The Sheet Metal Workers' Committee only offered in counter-proposal demands for the privilege of doing certain classes of pipefitting which the United Association will never recognize or grant either them or any other organization.

The United Association committee will make a full report on the above to the General Officers and members of the United Association.

The meetings with the National Industrial Relations Committee representing the Master Plumbers' Association and the Heating, Piping and Air Conditioning Contractors' National Association was called at the request of Mr. Robert Murphy, Chairman of the National Labor Committee, representing the National Association of Master Plumbers, for the purpose of discussing and developing a National Standard Form of Agreement that might prove best for the entire plumbing and pipefitting industry, including both the contractors and the membership of the United Association.

All present were in accord with this thought and future meetings are to be held in an attempt to make plans to further these thoughts.

Visited the Kingsbury shell loading plant at Kingsbury, Ind., accompanied by Business Representative Edward J. Dwyer of Local Union No. 597, United Association, and met with officials of Todd and Brown, who are operating this plant for the government. We discussed the representation of our plumber and pipefitter foremen.

In the original bargaining certificate granted to the various American Federation of Labor crafts in this plant, the foremen and general foremen were excluded unbeknown to the representatives of the United Association and in the new agreement, which has been recently consummated, no provisions were made for the United Association members now employed at this plant as foremen and general foremen.

We made it known to the officials that the United Association locals involved in this plant did represent all plumber and pipefitter foremen and that same were members of the respective local unions.

Further we made it known that we were seeking wage increases and certain conditions for the above classifications.

At this time I would like to warn all local unions of the United Association to be ever watchful that the right to represent plumber and fitter foremen be not denied them or that they be excluded from a particular bargaining unit that might be set up.

Received instructions from General President Martin P. Durkin and General Secretary-Treasurer Edward J. Hillock to proceed to Houston, Texas, for the purpose of offering my assistance to General Organizer Edward Switalski.

It did become necessary to revoke the charter of Local Union No. 214, United Association of Houston, due to very unstable conditions and actions of some of the radical element who insisted on carrying on the affairs of this local union contrary to the policy and best interest of the United Association.

In Pittsburgh, Pa., to attend meeting called by officials of the War Production Board, at

the instance of certain combination erecting and fabricating contractors who were attempting and desirous of over-riding the normal working condition of the journeymen fitters of Local Union No. 449, United Association of Pittsburgh.

Representatives of the Blaw-Knox Company, Pittsburgh Piping and Equipment Company and the National Valve Company were making demands upon General Organizer Milton McDonald and Mr. Crannon of the War Production Board to have them prevail upon the officers of Local Union No. 449, United Association, to permit them to prefabricate piping formations in their shops by others than journeymen of the United Association, at a lower wage scale and then to deliver this material to their erection jobs in the Pittsburgh area to be then erected by the journeymen, under the guise that this was a national controversy and was to be settled nationally. I informed those present that this was not a national problem and that it was the right of the local union to demand that this work be done in the field or shop of the erecting contractor by journeymen members of the United Association, receiving the predetermined and prevailing building construction rate of pay.

It was further brought out that there was no stoppage of work and that all jobs in the Pittsburgh area were proceeding towards their completion with the journeymen members of the United Association doing the welding and fabrication of pipe assemblies on the job.

Local Union No. 449, United Association, is insisting that all of the fabrication and making of pipe joints be done by journeymen members of their local union either on the job site or in the shop of the erecting contractor. (This in keeping with the mandate as rendered by the General Executive Board and published in the July and October, 1939, issues of the United Association Journal.)

While in Pittsburgh, I met with Mr. Harshbarger, president of the Pitt Construction Company, for the purpose of negotiating and signing a Standard National Form of Agreement. This company is engaged in the engineering and construction of sewage disposal stations, water treatment and filtering plants and pumping stations, along with general pipefitting and power piping.

In Toledo, Ohio, to meet with Brother Sam Green, business representative of Plumbers' and Steam Fitters' Local Union No. 50, United Association, we discussed the possibility of this local union entering into a Standard Form of Pipeline Agreement with a pipeline contractor of this city (Michael and Poling) who were most desirous of entering into a National understanding with the United Association and who had previously contacted General Secretary-Treasurer Edward J. Hillock on this matter.

Later, Brother Green and myself met with the officials of this firm and an agreement covering their pipeline work on a national basis was entered into and signed as between this local union and the contractor. This agreement was underwritten by the United Association and a supplemental National Agreement covering the Booster Pumping Station and Tank Farms in connection with transportation pipelines was also signed.

For the benefit of the membership of the

United Association, I would like to correct an erroneous impression which prevails throughout the country and that is—

That only certain local unions can enter into a Standard National Pipeline Agreement with transportation pipeline contractors.

I would like to state that the General Officers of the United Association are most desirous and would like to expect that all local unions attempt for their own benefit to protect the jurisdiction of the United Association on transportation pipe line work and that if any local union is in a position to properly man and police such work and where it is possible for them to negotiate an agreement with a local pipeline contractor, our General Officers would be only too pleased to underwrite such an agreement.

Returned to Chicago where I handled necessary correspondence and other matters of business.

In concluding this report I am preparing to leave for Houston, Texas.

John J. McCartin

At the close of my last report, I was on my way to Erie, Pa., on a matter of jurisdiction. The iron workers this time claiming

REPORT OF GENERAL ORGANIZER M. McDONALD

and starting to erect hand rails (welded) on the Pennsylvania Electric Power House. Business Agent Neil McLaughlin was more than reasonable with engineers and iron workers' contractors, who insisted we get a decision from Building and Construction Trades Department proving our jurisdiction. This was done with the understanding the iron worker knock off the work. Our wishes were complied with and decision was in favor of the United Association.

I next visited New Castle, Pa., and conferred with Business Agent Frank Crabb with regard jurisdiction of operation of gas driven welding machines. This work also comes under the jurisdiction of the United Association.

My next assignment brought me to Pittsburgh, Pa., where, in company with Business Agents Johnson and Hagemeyer of Local Union No. 449, matters of jurisdiction were settled with Business Agents McCaffery, Lawrence and Counahan. While at Pittsburgh, General President Durkin wired me to contact Secretary-Treasurer Leo Green of Local Union No. 449 and arrange a conference with National Valve and Manufacturing Company, Pittsburgh Piping and Equipment Company and Blaw Knox Company. This accomplished, matters of litigation necessitated me meeting General Secretary-Treasurer Hillock in Philadelphia.

Accompanied by General Representative John McCartin, Leo Green, Frank Johnson of Local Union No. 449, Michael Finn and Timothy Crannon of the War Production Board, several days were spent in conference with Joseph Nieolin and Harry Haller, representing National Valve and Manufacturing Company, Lew Hamilton, representing Pittsburgh Piping and Equipment Company, Nat Ornetz, representing Power Piping Branch

of Blaw Knox Steel Company. This conference resulted with the understanding that these companies would request General President Durkin arrange a conference with the National Board. I look forward to the National agreement being signed at this anticipated meeting.

I next attended a meeting with the Executive Board members of the Lead Burners' Locals 495, 532, 546 and 596. These men are most sincere in their efforts to bring about reasonable working conditions and harmony, have worked many hours on by-laws to govern the working activities of their members. By-Laws have been submitted to the General Office for consideration and approval, after which same shall be published for the convenience of their members.

My next assignment was to Camden, N. J., where matters pertaining to eligibility of auxiliary members to vote at election of officers was the misunderstanding—decision in this case, obviously is a member, in good standing has the right to vote at the election of officers.

I visited Scranton on two occasions and attended a joint conference with the employers and Executive Board of Local Unions No. 90 and No. 524 regarding increased pay. This conference will be resumed, and factual evidence shall be presented with respect to increased cost of living in the area of Scranton.

While at Scranton, I was invited to a dinner party given by the United Association members working on the bomber wing plant job. The officials of the construction companies, their subs, and officials of the Building and Construction Trades Council were in attendance. High praise and tribute was paid our members for a job well done by the speakers who addressed the participants. Your reporter was afforded opportunity to extend fraternal greetings and felicitations from our General Officers. A splendid musical programme and a chicken dinner was enjoyed by those in attendance.

Upon complaint of Contractor Rosenthal, General Secretary-Treasurer Hillock requested I visit Asbury Park, where, by appointment, I met Business Agent Wilbur Garriel. We visited the Naval job and amicable understandings were reached.

Upon notice from General President Durkin in company with Alvin Mehl of Philadelphia Local Union No. 420, and William Dobbins of Camden Local Union No. 322, we attended a conference with President Durkin at the General Office in Washington, D. C., on matters pertaining to the best interest of the membership of Local Unions No. 420 and No. 322.

While in the immediate vicinity of Hoboken, in company with Thomas Lake, I visited the shipyards to confer with Herbert Raisler, piping contractor. The work being contended for in my opinion is not the work of the sprinkler fitter, and I so ruled, namely, the running of a water main, its use to supply water to ballast ships—notwithstanding there are several fire plug connections from same for secondary fire protection.

Since my last report, Dr. Lapp, arbiter, has made decision with regard jurisdiction of various piping systems connected with the construction of butadiene plant at Philadelphia. I know all officers and members of Local Unions No. 690 and No. 420 will accept and abide by the decisions, keeping in

mind the best interest of our membership is protected when locals agree to adjust their differences of opinion through the medium of constituted authority—and arbitration.

Wilton Mc Donald

This is my report for the Journal for the month of December, 1943.

**REPORT OF
GENERAL
ORGANIZER
PATRICK J. DREW**

Because of a fine placed on a member of Local Union No. 706 of El Dorado, Ark., by Local Union No. 155 of Little Rock, Ark., and the necessity of explaining the policy of the United Association with regard to maintenance work, I arranged for a meeting of the Executive Board, through Business Agent Burns and Secretary Blankenship. All of those attending took part in the discussion and showed a fine understanding of the maintenance question and the need for action concerning this portion of our work. The Executive Board recommended to the next membership meeting of the local that the fine be rescinded and that the maintenance question be left in the hands of the business agent and organizer. The next day in the company of the business agent, I visited the plant of the Aluminum Ore Company about 25 miles outside of Little Rock, and met Mr. G. A. Rohlfing, personnel manager, who was quite friendly and knew Business Agent Burns quite well. This would show that the business agent is on the job, and although new and just elected, he shows a clear grasp of our policy. I believe we will get along alright.

In answer to three communications received from Secretary Hillock, dated October 13 and 25, and November 24, concerning the case of Brother Brown and Local Union No. 487 of Asheville, N. C., I sent a report to the General Office concerning this case on November 30. However, since then I had a talk with Business Agent R. B. Robertson about this matter, and he agreed to give Brother Brown his money back. He asked me how he could locate Brother Brown and I gave him the address that was in the letter sent to the General Office—2513 Westmoreland Ave., Kingsport, Tenn. If Brother Brown writes in again, please inform him to get in touch with business agent of Local Union No. 487.

On receipt of a telegram that Business Agent Dryman of Wilmington, N. C., desired my services and also telephone call from Organizer Garrett that Mehring and Hanson, who received contract on floating dry docks in Wilmington, also wanted to see me, with the Business Agent and Brother O'Neil, who is superintendent of Mehring and Hanson, and who is also an old member of former Local Union No. 463 of N. Y. The question was how to get more money than \$1.20 per hour. The business agent was talking about a bonus that some shipyards were paying some men, particularly welders, after completing a certain amount of work in less than the regular eight-hour day. Bonus would be paid for additional work done within the eight hours. I told the business agent and the superintendent that the United Association would not recognize any such understanding—that eight

hours constitutes a regular or standard day's work, and was to be paid for at the regular or agreed rate per hour. There is no real controversy between the employer and the union, and I am sure that everything will work out all right.

Answering three communications received from the General Office:

1. The letter sent to General Office by Business Agent Walter Brucher of Local Union No. 188 in Savannah, Ga., in regard to the manning of the Parris Island, S. C., project. This question has been a controversy for a long time, and the territory is better policed because of it. I see no reason to interfere unless it gets out of hand. At a later date, I will get both business agents together and settle the question.
2. The case of Brother Thomas Lyons, who stated that he paid an initiation fee of \$25.00 and was never obligated. Business Agent Meagher stated that this man worked in shipyards in Charleston, and was taken into Local Union No. 470 as a Marine fitter, and he will be obligated and given book as soon as he appears at their meeting. This letter was dated September 21, 1943.

With regard to the application of Local Union No. 17 of Memphis to amend their charter to include marine plumbing. Held a meeting with the business agents of Local Unions No. 17 and 614 of Memphis. Plumbers and steamfitters have been working on the ships for months following their lines of demarcation, same as on land, and getting along all right. I therefore recommend that the request of Local Union No. 17 be granted.

I have been in and out of Nashville a dozen times, and never had the pleasure of attending a meeting of our locals. I know how the officers and members feel about this. All I can say is I will attend the meetings of the locals in the territory assigned to me as soon as possible.

On Thursday, December 2, I attended Plumbers' Local Union No. 352 of Nashville, and the following night, Friday, December 3, I attended the Steam Fitters' Local Union 572 of Nashville. Most of the members of both locals are working out of town, and I appreciate the work the officers of both locals did to round up the men working around town, as both meetings were well attended. Our members can make you feel pretty good at times, and that is how I felt after both meetings.

Arrived in Johnson City, Tenn., to investigate the question of the prefabrication of our work. Business Agent Faucette of Local Union No. 538 was ill. I visited the job myself. The job is located at Kingsport, Tenn., about 20 miles outside of Johnson City. This plant is the Tennessee Eastman Company, and it is a war plant. The general contractor is Frazer Brace Company of New York. Our contractor is Baker and Smith Company of New York. I contacted their office and the general foreman, Tom Hyder, who is a member of Local Union No. 638 of New York. I went into the question with him and Mr. Collins of Baker and Smith. I then contacted Business Agent Faucette and told him what had taken place at the meeting at the plant—that the firm and the general foreman, Brother Tom Hyder, would cooperate with him and clear up any misunderstanding that exists relative to prefabrication of materials.

I received requests from Local Union No. 706 of El Dorado, Ark., and Local Union No. 665 of Pine Bluff, Ark., for jurisdiction of a housing job located at Fordyce, Ark., about half way between both locals. I had both business agents meet at job site and after conference, recommended to the general office that the job be awarded to Local Union No. 665 of Pine Bluff.

After receiving a wire from General Office to proceed to Winchester, Va., a request was received from the central body of that city for the services of an organizer. I contacted Brother Wilbur Swiggett, a member of the Teamsters' Union, who is president of central body, and he informed me that 19 men, plumbers and steamfitters, desired to become members of the United Association. I arranged to be there January 5, 1944, to attend a meeting of this group and advise what we can do for them.

While at Durham, N. C., I had the opportunity to take up with the business agent and secretary the matter of not permitting men to vote or hold office because they were working on maintenance work at a rate lower than the standard rate or lower than the rate paid on construction work. This is unconstitutional. Prior to the constitution being amended at the Cleveland convention in September, 1942, there was a section 124 which stated that in order to be eligible to office in locals, one must receive the standard rate of wages. That part was omitted in new constitution because it was confusing. Some locals interpret this to mean the highest rate paid on construction work when, as a matter of fact, \$1.20 per hour on marine work is the standard rate for that type of work and the standard rate for any other type of work is that rate that is recognized in that locality, regardless of what the top rate or construction rate may be.

On December 16, 1943, upon the invitation of Local Union No. 540 of Newport News, Va., I had the pleasure of installing the officers for the coming year. Business Agent W. E. Tench had no opposition. After the installation, they served Southern fried chicken and refreshments of every description. The local certainly "did themselves proud." Business Agent Joinville of Local Union No. 10, in Richmond, Va., was also a guest.

In Kansas City where meetings were held at various times with representatives of the International Brotherhood of Boilermakers and also with their local union business agents in an endeavor to adjust several controversies relating to our trade.

One subject which was discussed and which seems to require some clarification for both our members and the boilermakers is plate fabricated pipe. Because this pipe is made in some instances in a boiler shop is no reason to assume that the installation belongs to the boilermakers. The agreement between the boilermakers

and the United Association plainly defines the demarcation of work and allots to the boiler-maker certain lines and only when either riveted or welded. All other pipe work, no matter what size or what material, is very definitely the work of the United Association. This means that the pipe should be unloaded, erected and the joints made by whatever mode or method that may be employed to complete the work by our membership.

Completed tanks which are an integral part of a piping installation are also being lost to our members on a great many jobs. Iron workers, as well as boilermakers are rigging for and setting tanks that should be installed by steamfitters or plumbers. It behooves our members to insist that all work, both incidental and absolutely necessary to install a complete piping job, be performed by members of the United Association.

To St. Louis at the instruction of General President Durkin to attend a hearing by Trial Examiner of the National Labor Relations Board. This hearing had to do with the determination of the advisability of holding an election at the Midwest Pipe and Supply Company plant to certify a bargaining unit. This plant has been organized since 1937 as a United Association pipe fabricating shop and the C. I. O. is now attempting to intervene and be certified as a bargaining agent. The independent welders have also entered the picture with a petition to intervene and base their claims upon the practice of the Midwest Company in segregating their welders and claim it is a distinct and separate part of the pipe fabricating business. This mistake is also made by many of our local unions who attempt to segregate welding and thereby make themselves liable to just such litigation. Welding is just another method of making a joint and is incidental to the installation of the piping. We would never consider the steamfitter who makes up the bolts on flanges or makes up joints by threads as any other than a steam fitter, so by the same token the steam fitter who can weld should be considered in the same light. The hearing lasted two days and the findings of the trial examiner and the evidence submitted to the National Labor Relations Board in Washington.

While in St. Louis I also met Brothers Kiedrowski and Lamming of Lead Burners' Local Union No. 495 regarding some questions of interest to their local union. One of the boiler shops in St. Louis is lining tanks with lead and refusing to use members of Local Union No. 495 to do the work. Upon my return to Kansas City I referred this matter to Vice President Nicholas of the Boilermakers for his investigation, but due to his illness and the holidays, it has been delayed.

To Coffeyville, Kans., where a welder foreman classification had been established on the McKee Construction job. After an explanation had been made to Mr. Houser, the project manager, of our reasons for insisting that no such classification exists it was abolished. The policy of the United Association is against any such division in our ranks and the proper designation of steamfitter foreman was made. However, no foreman should be only in charge of steamfitters who can weld, as they are a part of the gang and under the jurisdiction of the gang foreman just as any other steamfitter. A clear understanding was

reached and the job is now going along in good shape.

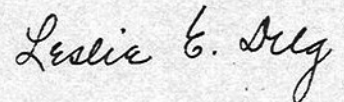

Back to Kansas City and visited the offices of the J. F. Pritchard Construction Company who are interested in signing a national agreement with the United Association. This company specializes in the construction of natural gas booster stations, pipe lines, alcohol plants and oil refineries. The matter has been referred to the general office and meetings are scheduled at a later date with General Organizer McCartin.

To St. Joseph, Mo., where Local Union No. 45 was in dispute with the Goetz Brewing Company. A meeting was held with the committee from Local Union No. 45 and Mr. Hagerty and Mr. Goetz of the Goetz Brewing Company, and an adjustment made which will allow work to proceed. This dispute was all brought about by the old jurisdictional disputes between the brewery workers and the United Association over the maintenance of piping in a brewery. Local Union No. 45 hopes to be able to arrive at an amicable agreement when the present contract between Goetz Brewing Company and the Brewery Workers expires in the spring.

To Hastings, Nebr., where the business of settling the affairs of Local Union No. 95 was taken up. Due to the condition of the books it was necessary to gather further information from headquarters and another trip will be necessary before it can be finally settled.

Back to Kansas City where I was contacted by telephone by Mr. M. C. Simonson of the United States Army Engineers Office in Lincoln, Nebr. Mr. Simonson was much concerned over a concentration camp located near Clarinda, Iowa, and which was badly needed by the army. He was afraid that the plumbers and steamfitters on the job would not return after Christmas and so would slow the completion of the job. I was able to reach Brother John Howell of Local Union No. 474, Council Bluffs, Iowa, by telephone and was assured by him that every effort would be made to complete the work on schedule.

I am closing this report at Kansas City where arrangements have been made to meet with committee from the National Automatic Sprinkler Association and Local Union No. 314 relative to the signing of an agreement for that industry in the Kansas City area.

With Business Representatives Mulally of Local Union No. 185, Corpus Christi, and Quinn of Local Union No. 195, Beaumont, called upon the Stearns-Rogers Company where we met Mr. Weis in order to discuss the possibility of employing members of the United Association.

While in Houston, was informed by General President Durkin that a committee from Steam Fitters' Local Union No. 214 of Houston, Texas, had been in Washington, D. C., demanding a hearing before the General Executive Board, relative to abrogating an agreement with Local Union No. 195 of Beau-

New Orleans Apprenticeship Program

An apprenticeship program for the training of Marine Pipe Fitters has been adopted for New Orleans, La., through a joint development of labor and management, it has been reported by H. B. Clark, chairman of the newly-formed Joint Marine Pipe Fitters Apprenticeship Committee.

The Committee was selected to represent the industry in New Orleans by the Marine Pipe Fitters Local Union No. 574 and the Marine Pipe Fitting Contractors. It consists of H. B. Clark, personnel director, Boland Machine and Manufacturing Company, chairman of the Committee; E. F. Ibele, superintendent, Dixie Machine, Welding and Metal Works, vice chairman; A. Stirrat, marine superintendent, Gulf Engineering Company; J. Rispoli, financial secretary, Local No. 574, secretary; P. Hammel, assistant business representative, Local No. 574; and R. Ortolano, Local No. 574.

Classes for occupational instruction will be conducted at the Delgado Trades School, under the organization and direction of the State Department of Education, Trade and Industrial Division. Dr. Andrew Triche, supervisor of the Division, is consultant to the Joint Committee.

Three other consultants, representing other agencies that assisted in preparing the program, will assist in

advisory capacities. They are: J. S. Voorhies, director, State Apprenticeship Council; Edward Boettner, Jr., field representative of the Apprenticeship Training Service, WMC; and A. P. Harvey, State Commissioner of Labor.

Eligibility for apprenticeship, and other details of training and compensation, are specified in a set of apprenticeship standards that was prepared with the assistance of the Apprenticeship Training Service. The existence of such standards is an assurance to all parties involved—the apprentice, the employer, and the trade—that the obligations and benefits are stated plainly in "black and white".

Although the apprenticeship requires approximately four years for completion, utilization of the apprentice in actual work begins right from the start.

"In his performance of unskilled operations at the very beginning", Mr. Clark commented, "the apprentice proves his value to his employer immediately. There is also a great personal satisfaction for him in 'doing things' at once. His value continues to increase as he proceeds from one phase of the work to the next".

Concurrent with his on-the-job training, the apprentice is required to attend school for vocational instruction at least 144 hours a year.

mont, Texas. But due to the fact that Local Union No. 195 was not given sufficient notification, and the opportunity to prepare briefs, etc., to defend their rights, this hearing was denied and referred to the organizer in the district for investigation.

Previous to this trip to Washington, D. C., by the committee of Local Union No. 214, thousands of miles were traveled by the business agents of this local union seeking assistance and support from the General Officers and members of the United Association. Visits had been made by them to Louis Guerard, Montreal, Canada; Peter Schoemann, Milwaukee, Wis.; Joseph Lahey, Fort Worth, Texas; Harry J. Ames, Seattle, Wash.; Leo A. Green, Pittsburgh, Pa., and William McLaughlin, Brooklyn, N. Y., members of the General Executive Board.

The regular meetings of practically all the local unions in the State of Texas were also attended by them.

On receipt of the order from President Durkin, arrangements were made through the officers of Local Unions No. 195 and No. 214 for committees to be appointed with power to act to agree to some mutual understandings. Several weeks were spent in the vicinity of Houston and Beaumont, many meetings were attended with the officers and committees of Local Unions No. 195 and No. 214, trying to iron out the difficulties,

but due to the ultimatum presented by Local Union No. 214, it necessitated the revoking of the charter of Local Union No. 214 of Houston, and the consolidation of these two local unions. Upon this action, we were immediately served with a restraining order citing Ed Switalski, General Organizer, representing Martin P. Durkin, General President of the United Association, and Pipe Fitters' Local Union No. 195 of Beaumont as the defendants, restraining them from revoking the charter of Local Union No. 214 and molesting the funds and properties of said local union. The hearing date set for a permanent injunction was January 5, 1944. A complete report of this case will be published in the next issue of the United Association Journal.

While in the vicinity of Houston and Beaumont, many propositions were adjusted by telephone.

A meeting of the United Association members of the Gulf Coast Metal Trades District Council, at New Orleans, La., was attended, and a report of this conference will be found under the report of General Organizer Strom.

Left for Portsmouth, Ohio, to spend the holidays with my family.

Ed Switalski

"Shakedown" Taxes

In a letter sent by President Whitney of the Brotherhood of Railroad Trainmen to members of Congress several weeks ago, there are several statements which strike at the very heart of the suggestion of a national retail sales tax. Specifically, he stated that:

"It is shocking to discover some leaders in public life yielding to selfish interests in their demand for a Federal sales tax, the tax that imposes a levy on the poor man's bread, that is wasteful of administration, and that is positively immoral from an equitable social standpoint.

"Almost 100 per cent of low incomes is spent for actual necessities of life, while only a small per cent of high income is likewise spent. Thus, a sales tax applies 100 per cent to low incomes, but only in a small and insignificant way to large incomes. In short, the sales tax completely reverses the just principles of taxation according to ability to pay.

"Citizens of Ohio are already burdened with a 3 per cent state sales tax. Notwithstanding the serious paper shortage, measly little sales tax stamps, printed at great cost, are passed out for every transaction, with some exemptions, involving a sale of 10 cents or more. There is also the great expense and nuisance to merchants and others in collecting and accounting for this shake-down method of taxation.

"I refer to the sales tax as a shake-down, because it fleeces consumers without their direct awareness. I urge members of Congress not to jump to the conclusion that this characteristic makes it an ideal tax to impose on voters. Voters of today are better informed and are persuaded by what they feel as well as what they see."

LOCAL NEWS and VIEWS

Lieut. Martinek, Local 93, Reports His Activities

Mr. Martin P. Durkin, Gen. Pres.,
United Association,
Washington 1, D. C.

Dear Sir and Brother:

In view of the fact that my local (93) is keeping up my dues, I feel that the least I can do is to send an occasional report of my activities.

I've recently returned from five months' duty piloting a Liberty ship, hauling troops, ammunition and prisoners between Sicilian and Italian invasion points and Africa, concluding with the entire Salerno Bay episode.

I still retain the same high regard for the Maritime Service that I displayed last spring in the U. A. Journal. This is my second war and "teenth" campaign and experience prompted me to recommend this outfit to my U. A. Brothers.

For the young fellow this service presents an opportunity to observe the other units at the front, minus U. S. O.'s pretty girls and brass bands, and if after that any other service appeals to him he can apply for admission on completion of his voyage.

Regarding the "old timer", this is the only front line organization that showed any confidence in a non-professional over 50 and incidentally discovered "ripe" judgment outweighed arthritis.

Although, I'm in the deck department, I was "shanghaied" into a plumbing assignment, when 1,500 Sicilian prisoners were suddenly jammed onto the ship late one afternoon for delivery to Africa.

I selected a group of prisoner carpenters, and had them knock together several 30-foot planks V fashion, board up one end and run the other over the side. Then, I stretched a fire hose leading to the boarded end and opened the valve.

It was dark by that time, and the prisoners had been herded into the holds for the night, thereby depriving me of the immediate satisfaction of viewing my sanitary success.

The next morning, I looked aft, to see the prisoners using the troughs

*Lieutenant Cyril Martinek
Member Local Union No. 93*

as wash basins and laundry tubs, with only an occasional individual using the equipment for the original purpose. Although an educational campaign straightened things out, I was known as the most "misunderstood man" on the ship the rest of the trip.

The photo herewith, shows me carrying "tools" even though I thought I had laid them down with overalls. In my right hand, I am carrying an Italian sword, German pistol, and gas mask; in my left hand, a gas mask can, Sicilian Bolo and Sicilian water tank (earthen urn) and incidentally about the only complete article left in many a bomb-demolished dwelling.

I'm all out for the Maritime Service.

Thanking you for past favors, I remain

Fraternally yours,
Cyril Martinek,
Lieut. (j.g.) U.S.M.S.
754 Northmoor Road,
Lake Forest, Ill.

Card No. 134604, Local 93,
Waukegan, Ill.

ORGANIZED LABOR IN THE AMERICAN LEGION

Readers of the Journal who recall the ten-round match between Commander Atherton of the American Legion and President William Green at the A. F. of L. convention will be happy to learn that the Legion has appointed some labor men on its Labor Relations Committee. President James B. Burns of the American Federation of Government Employees was selected for the committee as an A. F. of L. representative. Edward J. Kelly of the Railway Mail Association, A. F. of L., was also appointed.

These appointments lead one to believe that much more work could be done by those members of organized labor who belong to the Legion. While labor can and has been able to combat the alleged labor views of the veterans, there is a definite need for positive action within the ranks. The time has come when union men in the American Legion and in other organizations must stand ready to participate actively in the shaping of opinions about organized labor. Labor can do without those members who are strong as an ox for union principles at the union meetings, but—like Ferdinand the Bull—"just love to smell the flowers" when they are in civic organizations.

BRITISH-AMERICAN LABOR EXCHANGE

Recently four American workingmen returned home after a three-week tour of the war-plants in England, Scotland and Wales. The visit was the result of a plan to let representatives of organized labor in the two nations to see for themselves how labor was participating in the war against the Axis. The American delegation was made up of Hugh T. Mahoney of Bethlehem, Pa., United Steel Workers, C. I. O.; Joseph Smith of Detroit, Mich., United Auto Workers, C. I. O.; Otto O. Butler, of East St. Louis, Ill., Chemical Workers Union, A. F. of L., and Stanley Seizyk, of North Hollywood, Calif., International Association of Machinists, A. F. of L.

The reactions of these men were very interesting. For example, the fact was recognized that the attitude of British employers toward organized labor was, in contrast to that of their American counterparts, that of gen-

JOURNEYMEN PLUMBERS AND STEAMFITTERS**

Office of publication
1220 H St., N. W., Washington 5, D. C.
EDWARD J. HILLOCK Editor
Machinists' Bldg., Ninth and Mount Vernon
Washington 1, D. C.
Long Distance Telephone: National 8487
Subscription rates: \$1.00 per year.

Contributions for the Journal must be received before the 15th of each month to insure publication in the following issue.
News notes and articles of interest to our craft are respectfully solicited.
If you do not receive the Journal, or change your address, notify the secretary of your local.
The United Association is not interested in a souvenir publication of any kind.

Additions, corrections or alterations reported by local secretaries should be kept separate from other correspondence. When member deposits his card and his name is reported for the Journal list, the secretary should state where the member previously received the Journal, and give the name and number of the union with which he affiliated. When a member draws his card, is suspended or expelled, or in any manner ceases to be an active member of the local, the secretary should see that his name be dropped from the mailing list.
The 15th of each month is the latest date upon which changes for the succeeding issue can be made on our mailing list.

Items for the official columns of the Journal should be prepared on a separate sheet, and the style of the paper followed as closely as possible. Such items should not be made a part of a letter dealing with other subjects for if this is done the items are likely to be overlooked, even though greatest care be exercised. Write as plainly as possible—especially proper names, using one side of the sheet only. Communications must in all instances be accompanied by the author's name and address. All official matter must be in the hands of the editor before the 15th of each month to insure insertion in the issue immediately following. The observance of the foregoing will tend to insure what is desired by all—promptness and accuracy in the publication of official matter.

Local Union News and Views

(Continued from page 14)

eral acceptance. In other words, the British business man recognized that the organized labor movement was no passing fancy; like taxation, it was here to stay. While the employers over there maintained traditional attitudes on the usual problems of labor, collective bargaining was regarded as the twentieth-century method of settling differences.

The opinion of the typical British workers that labor should participate actively in the peace conference was voted by the Americans. Behind this attitude of our Allies was the thought that since this was a total war and since labor was contributing to the successful prosecution of the war, that labor should have a voice in the peace. A war of the people, by the people, and for the people could be complete

only if they shared in making the peace.

Above all, the American workers were impressed by the hospitality and friendliness of the British. As one of the men expressed this fact:

"I spent a night at a steel worker's home, met his family and ate two meals with them. I believe there would be less hullabaloo about Anglo-American relations if all of us could spend a night at each other's homes".

A delegation of British workers is now in America to see how our workers live and work. The wish can be expressed that they too will recognize that the Harrys, Toms and Mikes of America are quite like themselves and that our problems are in many ways similar to their own.

Can Patriotism Be Legislated?

(Continued from page 2)

made only after every other method has clearly failed.

A Proposal

If there is a substantial question about the successful prosecution of the war unless the men and women of America forego the fundamental right of working where they believe they are contributing fully to the war, then let there be a genuine militariza-

tion of the Nation. Allow no one to refuse to work. Allow no one to refuse a particular job. Set wages and salaries at the military levels. Abolish profits. Limit interest payments. Grant only military allowances for dependents. Eliminate democratic thinking. Demand absolute obedience.

LEGISLATE PATRIOTISM AND LET'S TRY TO GET ON WITH THE WAR.

Re-Negotiation of War Contracts

(Continued from page 1)

needed for the post-war era may be sound, but it is not a good reason for scrapping contract renegotiation. All income receivers need "seed capital" for the post-war era. For example, it would be just as logical to loosen wage regulation to the point where wage increases earned now could be "salted away" as a post-war fund to be applied against future income taxes.

One conclusion seems self-evident. There is no indication that the procedure of contract renegotiation is unjust or improper. The results of the

procedure lead to a reduction in the costs of the war. In turn, lower costs mean less taxation. Most assuredly, therefore, the members of Congress should not discontinue contract renegotiation, particularly when some of its members are so frightened by the costs of the war that they are willing to place sales taxes on such necessities of life as food, clothes and medicine. To permit business firms to keep unwarranted profits at this time is plainly illogical and unsound.

Let's all
Back the Attack

WAR LOAN

Official

Agreement on Transfer of Union Construction Workers From One Area to Another

In recognition of the practical problems inherent in the migrant nature of building and construction trades employment, this agreement is designed to afford an opportunity to increase production and make greater utilization of the experience, skills and referral procedures of the building and construction unions.

When the authorized agent of a union cannot supply a sufficient number of workers requested of him by an employer, he shall ascertain if the needed and qualified workers are available at the nearest office of the United States Employment Service. If that office is unable to refer promptly the total number of qualified workers to meet the specifications of the union, the union agent is authorized to request from agents of the union in other areas the referral of sufficient workers to meet the balance required.

Upon receipt of such a request, an agent of the union may refer workers directly to such an area, in accordance with the requisitioning union agent's instruction, provided the union agent in the recruiting area has first received certification from the United States Employment Service

office for his area that there are no unfilled local orders in the area for workers having the qualifications required of those to be referred.

The union agent shall not refer any workers out of his area, under the above provisions, who are not eligible for such referral under the applicable Stabilization Program and other regulations of the War Manpower Commission office in the recruiting and requisitioning area.

The union will conduct such recruiting and referral in accordance with the policies set forth in the Stabilization Program and other regulations of the War Manpower Commission.

Appeals arising from interpretation or rulings made under this agreement will be made, first to the appropriate Area Manpower Committee and, if necessary, to Regional and National War Manpower Committees.

Appeals reaching the National Committee will be referred to a special panel designated by the Committee composed of representatives of labor and management of the building and construction industry. This panel will submit its findings and recommendations to the Committee.

Hanford Engineer Works, Hanford (PASC0) Washington

Can use Journeymen Plumbers, Steam Fitters and Steam Fitters that are able to qualify as welders, who must take a welder's test.

The wage rate for Plumbers is \$1.65 per hour; Steam Fitters, \$1.65.

Conditions of Employment:

Travel expense from place of recruitment to Hanford, Wash., will be advanced by contractor, such expense to be repaid by deductions during course of employment. Normal work week, 54 hours, overtime at time and one-half after eight hours and on Saturdays, Sundays, and holidays. Probable length of employment, 6 months to 1 year. Housing adequate for all employees. Cost of board and room

\$2.00 per day. Inexpensive transportation from nearby towns, Pasco and Hanford, Wash., and Pendleton, Ore., to the job. No housing for families. Trailer camp on job site for those owning trailers. Proof of citizenship required. Bring due books, leave clearance card with Local Union. Advise when ten or more are ready to leave and will send expeditor to advance railroad transportation and subsistence, if required. These advances deductible from weekly pay. Will also help obtain gasoline. Railroad fare refunded on lowest coach fare providing employee completes four months employment with not more than two absences month. Additional details may be obtained from Vincent Larish, 309 Lewis Street, Pasco, Wash.

RESOLUTION BY LOCAL UNION NO. 79

Whereas it has pleased the Almighty to remove from our midst our beloved Brother Steve Dwyer, December 28, 1943, whose untimely death was a shock to his family, our members and his many friends.

In 1942, Local Union No. 79 granted Brother Steve Dwyer a paid-up Life Membership, after 50 years of faithful service to members of the United Association and Local Union No. 79. He also was President of the Central New York District Council at the time of his death.

Resolved, That we, the Officers and Members of Local Union No. 79, extend to the members of his family our heartfelt sympathy in their hour of sorrow; and be it further

Resolved, That a copy of these resolutions be sent to the bereaved family, a copy be spread on the minutes of Local Union No. 79 and a copy be sent to the General Office for publication in our Official Journal; and be it further

Resolved, That our charter be draped for a period of 30 days.

*Herman W. Gates,
Joseph Haak,
Thomas Long,
George Tessey,
Thomas Quinlan,
Frank Amhrein,
Committee.*

RESOLUTION BY LOCAL UNION NO. 87

Whereas the Creator in His infinite wisdom saw fit to take from this life and from our midst our Brother O. S. Washabaugh, who died December 18, 1943; be it

Resolved, That we, the membership of Local Union No. 87, extend to the bereaved family our heartfelt sympathy; and be it further

Resolved, That out of respect to our departed Brother our charter be draped for a period of 30 days; and be it further

Resolved, That a copy of these resolutions be sent to the family of the deceased, a copy forwarded to the Official Journal for publication, and a copy be spread upon the minutes of this local.

*Thomas Crogan,
Business Agent.*

1220 H Street, N. W., Washington 5, D. C.

MOUNT VERNON

The home of George Washington, first President of the United States, whose birthday will be celebrated on February 22, is located in Fairfax county, Virginia, on the right bank of the Potomac river, fifteen miles south of Washington. The dwelling is a wooden mansion 96 feet long, erected on a bluff 200 feet above the river, and commanding an excellent view. The home contains an abundance of interesting relics including the key of the French bastille and is open the year around for public view.
